

## Brain Injury Support Groups

Support groups function independently of BIAF and differ in each community, depending on the needs and desires of attendees. BIAF provides resources, educational materials, and technical assistance where possible. For information about these groups and their meeting locations and times, please contact the individuals listed. Since each group is different, you are encouraged to contact several groups, to find the one that best meets your needs. For additional information about meeting dates and times, [visit us on Facebook](#).
